

CleanTech 2010

The 14th international convention and exhibition for renewable energy, water technology, green construction, energetic efficiency improvement, recycling and quality of the environment.

“CleanTech Industries - An engine of growth - & a lever for a greener world”

INVITATION

To the International Opening Session Of the 14th “CleanTech” Expo

29 June 2010, Pavilion 1, Fairs & Conventions Center, Tel-Aviv

Opening session guests of honor
Latin American states - Export potential for Israeli industries

According to expert forecasts by 2025 two-thirds of the world’s population would suffer from severe water shortage! The issues of global warming and water shortage demand development of advanced CleanTech technologies. CleanTech industries grow at astonishing pace and it is important that each and every state would adopt CleanTech approach and to develop an industrial CleanTech capacity of its own.

I’m honored to invite you to the International Opening Session of “CleanTech 2010” – The 14th annual international convention and exhibition for renewable energy, water technology, green construction, energetic efficiency improvement, recycling and quality of the environment.
